*Dr. David Martin is somewhat of a polarizing figure among the ‘truth movement’. This may be by design, as Omar Jordan opines in his well-researched article on the topic of Martin’s clear masonic affiliations, and is quite clear that he considers Martin to be a shill for the cabal:*

For some of us, this person’s duplicity in the psychological operation was evident from the moment he sat down with Mikki Willis for an interview. We didn’t even need to research further, because we felt it intuitively. I smelled the deception before reading a single word about him, and now here we are, one year later - and people are **still** promoting this guy as some sort of truth-teller, and freedom-fighter. But if you understand that this entire COVID19 operation is part of a psychological war, then you might also understand that David’s bioweapon story is and always has been a **red herring**. If you don’t understand this, then there’s a long list of books you can read up on, on the subjects of Virology and Vaccines, and this paper probably isn’t for you.

Henry Makow weighed in on this topic as well:

I find the anti vax/depopulation message credible but it's disturbing that the names above are linked to Theosophy. I have promoted some of them. It's possible I was inadvertently spreading disinformation. However, [this article](#) which I commissioned, should demonstrate that my commitment is to the Truth, whatever it is.

Regardless of whether the vaccines are harmful or not, people have a right to say no. And given the pressure to vaccinate, you can guess there's a sinister Communist control and depopulation agenda. They've got all the money. Now they want all the souls.

A pandemic with a minuscule death rate is not a pandemic but a ruse to get people to vaccinate. So regardless if the above seem associated with the occult, does it mean they're insincere? Does it mean their message is false? Is their role to generate fear? What's your opinion? hmakow@gmail.com

I am intrigued by the possibility that we are being played. Recall that Freemasons were on both sides in World War Two. But until I see more evidence, the names above are still credible to me.

*The reality is ostensibly more nuanced. This isn't anything so austere as [The Elite vs The Rest of Us](#). Most choose not to look any deeper into the [the war](#) which has been ongoing between the covert factions for hundreds of years, failing to take into consideration that although they may share the same [occulted knowledge](#), the shadow factions do not share a common agenda.*

*So with an open mind and an acknowledgment that I don't have enough information to determine his true intentions, I discern what I can from David Martin's words and actions, and will keep watching for cracks in intention or integrity as the Great Reset continues to play out.*

*He's articulate. He's passionate. He never mentions the [graphene](#). He never addresses the [viral pathogenesis theory](#). He has an [interesting tattoo](#) – a symbol of the ancient [Saturnian cult](#).*

*Time judges all.*

## Summary

---

Dr. Martin provides the names, faces and addresses of some of the [COVID Conspirators](#). There is no virus. There never was. There is a chain of patents and money which present strong evidence of collusion to reduce the global population with extreme prejudice. They are not vaccines – they are [bioweapons](#). When we start to call it what it is, then all of the ridiculous and illegal mandates and actions make sense. They have infiltrated governments, judiciaries and legislatures. Where there is a felony, all contracts are void and [the perpetrators](#) forfeit protection from liability.

In recognition of these limitations, the President signed the Executive Order on Modernizing Influenza Vaccines in the United States to Promote National Security and Public Health on **September 19, 2019**. Broadly, the Executive Order directs BARDA, CDC, NIH, and FDA to accelerate the adoption of improved influenza vaccine technologies. In alignment with the goals of the Executive Order, NIAID is conducting and supporting research to develop state-of-the-art vaccine platform technologies that could be used to develop universal influenza vaccines as well as to improve the speed and agility of the influenza vaccine manufacturing process. **These platform technologies include DNA, messenger RNA (mRNA), virus-like 5 particles, vector-based, and self-assembling nanoparticle vaccines.** For example, NIAID supported scientists are investigating an mRNA vaccine candidate that would allow for a more rapid and flexible response to both seasonal and pandemic influenza than do existing vaccine production strategies.

# The COVID World at VAX

**Countries, donors and multilateral institutions must be prepared for the worst.**

A rapidly spreading pandemic due to a lethal respiratory pathogen (whether naturally emergent or accidentally or deliberately released) poses additional preparedness requirements. Donors and multilateral institutions must ensure adequate investment in developing innovative vaccines and therapeutics, surge manufacturing capacity, broad-spectrum antivirals and appropriate non-pharmaceutical interventions. All countries must develop a system for immediately sharing genome sequences of any new pathogen for public health purposes along with the means to share limited medical countermeasures across countries.

**Progress indicator(s) by September 2020**

- Donors and countries commit and identify timelines for financing and development of a universal influenza vaccine, broad spectrum antiviral, and targeted therapeutics. WHO and its Member States drawing options for standard procedures and timelines for sharing of sequence data, specimens, and medical countermeasures for pathogens other than influenza.

Emergency does not create power. Emergency does not increase granted power or remove or diminish the restrictions imposed upon power granted or reserved. The Constitution was adopted in a period of grave emergency. Its grants of power to the Federal Government and its limitations of the power of the States were determined in the light of emergency, **and they are not altered by emergency.** What power was thus granted and what limitations were thus imposed are questions which have always been, and always will be, the subject of close examination under our constitutional system. While emergency does not create power, emergency may furnish the occasion for the exercise of power.

## The COVID “Intolerable Acts”

- Amendment I

- Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof; or abridging the freedom of speech, or of the press; or the right of the people peaceably to assemble, and to petition the Government for a redress of grievances.

While Congress didn't restrict speech, assembly, or right to petition, it made no effort to uphold and defend these rights. Further, it stood by as these rights were abused by every Emergency Declaration in violation of Supreme Court rulings. By allowing Federal Contractors to disregard the Constitution, they've violated this Amendment.

## The COVID “Intolerable Acts”

- Amendment IV

- The right of the people to be secure in their persons, houses, papers, and effects, against unreasonable searches and seizures, shall not be violated, and no Warrants shall issue, but upon probable cause, supported by Oath or affirmation, and particularly describing the place to be searched, and the persons or things to be seized.

By declaring every person a probable “asymptomatic carrier” the Federal Government (CDC, FDA, and DHHS) violated this Amendment and enabled the reckless abuse that harmed countless individuals. Loss of life, liberty and livelihood has been a DIRECT result.

- Amendment V

- nor shall be compelled in any criminal case to be a witness against himself, nor be deprived of life, liberty, or property, without due process of law; nor shall private property be taken for public use, without just compensation.

There has been no due process as the Courts have unilaterally stipulated the “epidemic” or “pandemic” without a single effort to demonstrate, beyond reasonable doubt, that there is either. Further, while changing the definition of “vaccine” to include “gene therapy”, the courts have inappropriately applied *Jacobson*

## The COVID “Intolerable Acts”

- Amendment VI

- In all criminal prosecutions, the accused shall enjoy the right to a speedy and public trial, by an impartial jury of the State and district wherein the crime shall have been committed, which district shall have been previously ascertained by law, and to be informed of the nature and cause of the accusation; to be confronted with the witnesses against him; to have compulsory process for obtaining witnesses in his favor, and to have the Assistance of Counsel for his defence.

No judicial standard has been applied to validate the false claims of SARS CoV-2 “causing” COVID-19. Therefore, every derivative prosecution is in violation of the Sixth Amendment. - Amendment X

- The powers not delegated to the United States by the Constitution, nor prohibited by it to the States, are reserved to the States respectively, or to the people.

The final clause in the Tenth Amendment “or to the people” has been supplanted by States assuming police powers without limit. This tyranny effectively nullifies all Constitutional protections.

**The Brighton Collaboration laid the foundation for gaining control of vaccine-related information by establishing an infrastructure for developing universal vaccine risk assessment standards, prescribing vaccine research strategies and methods, forming expert advisory panels, influencing journal publication selection, generating propaganda campaigns to gain trust.**

One of its stated missions is to increase public confidence in the safety of vaccines.

*"The Brighton Collaboration, together with the London School of Hygiene and Tropical Medicine's Vaccine Confidence Project, is promoting research on the determinants of trust and distrust in vaccines generally as well as on the drivers of vaccine «scares», [and vaccine hesitancy] the manner in which they develop and spread, and effective strategies to best address vaccine safety concerns."*

This collaborating partnership of vaccine stakeholders re-defined what qualifies as an adverse reaction to a vaccine. When newborn infants suddenly died within days following vaccination, the Brighton Collaboration re-defined sudden infant deaths within 10 days of vaccination, declaring the deaths "unrelated to the vaccine". [See Appendix 8]

Their primary goal is to protect high vaccination rates with a stream of positive reports. Thus, grants are awarded only to those whose research proposals are designed to validate the safety of vaccines. A second goal is to prevent research that could document safety hazards that would undermine vaccination policies. The main objectives of the Brighton Collaboration:<sup>40</sup>

“So once more in history a few of us are screaming of pending Genocide, to a world that is mostly deaf, actually worse than deaf. Dismissive with the ignorant reframe, people have actually been taught by the media and the Globalist Fascists, “It’s a conspiracy theory” usually accompanied by a slight chuckle which is meant on one hand to put the person giving the warning down, but also holds just a slight nervous twinge that the person providing

the warning may be correct. These people do not even understand that they have been taught the, “conspiracy theory”, reply, They are robots, it was a reframe and cover up invented by the US CIA in the 1960s.

The Globalists and their Malthusian, Flying Monkey Greens are anti-human, anti-God, they want to reduce the Global population down from 7 billion people, to 1 billion people. Through a range of methods much of which they have already put in train. To see the future all you need do now is follow the trend to an obvious conclusion.”

**Abstract**

**Background:** COVID-19 vaccines have been linked to myocarditis which in some circumstances can be fatal. This systematic review aims to investigate potential causal links between COVID-19 vaccines and death from myocarditis using post-mortem analysis. **Methods:** We performed a systematic review of all published autopsy reports involving COVID-19 vaccination-related myocarditis through July 3<sup>rd</sup>, 2023. All autopsy studies that include COVID-19 vaccine-induced myocarditis as a possible cause of death were included, without imposing any additional restrictions. Causality in each case was determined by three independent reviewers with cardiac pathology experience and expertise. **Results**  ally

“Excess deaths not caused by COVID-19 have been identified worldwide after the mass COVID-19 vaccination programs began, indicating the presence of a novel detrimental exposure among populations. Pantazatos extrapolated that VAERS reports are underreported by a factor of 20. When this factor is applied to the June 16th, 2023, VAERS death report count of 35,487, the number of deaths in the United States and other countries that use VAERS becomes 709,740. Should this sizeable number of fatalities be confirmed, the COVID-19 vaccines would constitute the largest biological safety disaster in human history.”

Vaccines, Parasites & Ivermectin. Trypanasoma is a microscopic parasite which has numerous non-specific symptoms, is seldom tested for and if left untreated is almost always fatal within a few years of infection. These factors combined with a long onset period – which makes it difficult to retrospectively ascertain the source of infection – would make this seem to be a perfect bioweapon. All that is needed is a suitable intravenous delivery mechanism...
